**MESSAGE (NOT) RECEIVED**

Ongoing Communication Training Programme

University of Glasgow

A great way of getting the message across that a lot of organisations have been trying to get across – for years!

Brilliant, enlightening and humbling

One of the best workshops I've attended in 28 years in General Practice

Really made me think

It's very important to talk about cancer – it helped me understand

In my opinion every health professional should see this and take on the messages

Who better to train support workers than the people we support?

It's culture change we're looking for, and the Group can do that in a way that a lot of us can't.

A revelation!
